R/

Myself akash walia from sector 70 & i'm working with the Health Department, Panchkula. My daily schedule is via Tribune chownk, to sec. 26 (transport lights) to DT lights & then housing board lights, Manimajra. And u know well that always heavy traffic congestion is there.

And today morning as my daily schedule i passed all the other traffic lights & reached DT lights & u know today raining was going on so today more traffic on road than other days. But the main thing that i notice today when reached on DT lights, the lights were not working & heave traffic congestion were there but even then one of your young constable lady wore over court stood center the lights (in raining) & directions were giving to traffic & the other side that one of your another senior official who worn their dress with cap & with two or three stars on his shoulder (he seems like a senior officer). He took a umbrella in his hand and he also stood on the road & given the direction to traffic.

Really i shocked coz raining was going on & in the raining a senior officer took umbrella & a young lady constable worn a over-court & directions given to treffic. Seriously I appreciate.

Even i don't know your both official & haven't seen anywhere don't know their names but this time really i impressed Coz normally we've seen your traffic police, they are not performing their duty well. But this time even a beat box is there the senior person can sat under the beat box but he stood in rain & giving directions to traffic. This is appreciable cause.

Pls. advice your other officers when they are on road then don't behave like officers & when they're on the chair then behave like the officers. The live example is as above.

Regards/  
akash walia
